

Schlumberger Water Services Launches Diver-NETZ

The evolution in wireless groundwater monitoring networks

WATERLOO, Canada, October 2007 - Schlumberger Water Services (SWS) today announced the release of the Diver-NETZ system, a complete package of tools that allow groundwater professionals to wirelessly connect their monitoring networks. Diver-NETZ is completely expandable and ready to work with existing Diver groundwater monitoring networks. All of the components in the Diver-NETZ system are designed to streamline project workflows, enabling user's to effectively manage groundwater resources for the long-term.

With Diver-NETZ, groundwater professionals are able to:

- Connect wirelessly to your groundwater monitoring networks
- Dramatically improve data collection in the field
- Achieve precise measurements of groundwater conditions with a complete line of dataloggers
- Map, analyze, and report data using the best software in the industry

The Diver-NETZ system consists of:

- **Diver-Suite** - Achieve precise measurements of groundwater levels, temperature, and conductivity[†]. The Mini-Diver,* Cera-Diver,* Micro-Diver,* CTD-Diver,* and Baro-Diver* offer reliability and accuracy.
- **Diver-DXT** - Acquire data and adjust Diver settings wirelessly. The Diver-DXT connects directly to Diver dataloggers in the well and instantly links to your handheld device.
- **Diver-DXD** - Wirelessly connect to the Diver-DXT in the field and instantly download Diver data. A detachable "antenna" offers secure data streaming to the handheld device or portable computer
- **Diver-Pocket** - The Personal Digital Assistant (PDA) software offers a graphical user interface which finds deployed Divers, adjusts sample method/frequency, and visualizes data.
- **Diver-Mate** - Plug-in, download, and store Diver data in the field. Diver-Mate is a simple storage device that connects directly to Diver Data Cables.
- **Diver-Office** - Read and program multiple Diver dataloggers in the office and prepare data for advanced analysis using the Waterloo Hydrogeologic Software suite.
- **Diver-HUB** - Centrally view and share Diver data online. Diver-HUB facilitates storing, visualizing, and reporting via a secure, online data management service.

From field to office, Diver-NETZ offers a complete network of advanced technologies to help you manage your groundwater resources effectively. Visit www.swstechnology.com to learn more.

About Schlumberger Water Services

In 2001, Schlumberger created Schlumberger Water Services, a global organization leveraging leading-edge technologies for worldwide water resource management applications. Through investment in water industry expertise and proprietary technology, Schlumberger Water Services has established leadership in aquifer evaluation, characterization, and groundwater resource management. Capitalizing on Schlumberger's global presence and support infrastructure, Schlumberger Water Services has successfully completed numerous projects in six continents, helping to meet future water demands in a wide variety of environments and applications. Schlumberger Water Services' experience and technology provides its clients with the decision-making framework for addressing short and long-term water challenges and solutions to minimize uncertainty and reduce risk, even under extremely challenging conditions. About Schlumberger

Schlumberger is the world's leading oilfield services company supplying technology, information solutions and integrated project management that optimize reservoir performance for customers working in the oil and gas industry. The company employs more than 70,000 people of over 140 nationalities working in more than 80 countries. Schlumberger supplies a wide range of products and services from seismic acquisition and processing; formation evaluation; well testing and directional drilling to well cementing and stimulation; artificial lift and well completions; and consulting, software, and information management. In 2006, Schlumberger operating revenue was \$19.23 billion. For more information, visit www.slb.com.
